1. The abstract of the disclosure is objected to because superfluous language issued in this paragraph (i.e., "the present invention provides"). Correction is required. See MPEP § 608.01(b).

2. Claims 1-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1, the term "can be" (line 12) is indefinite. Similarly noted claims 11 & 21.

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 2124

4. Claims 1-30 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-30 of copending Application No. 09/996,227. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited references are art of interest.

6. The following is an examiner's statement of reasons for allowance: the recorded references do NOT teach or suggest: (1) the **"method for using a computer system to solve a system of nonlinear equations specified by a vector function, f,"** having **manipulating & producing, substituting, solving and intersecting steps** as recited in independent claim 1, (2) the **"computer-readable storage medium storing instructions that when executed by a computer cause the computer to perform a method for using a computer system to solve a system of nonlinear equations specified by a vector function, f,"** having **manipulating & producing, substituting, solving and intersecting steps** as recited in independent claim 11, and (3) the **"apparatus that uses a computer system to solve a system of nonlinear equations specified by a vector function, f,"** having **symbolic manipulation mechanism, solving mechanism and intersecting mechanism**" features as recited in independent claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
